

ABHISHEK RAJORIA

New Delhi | +91 9319054781 | AbhishekRajoria24@gmail.com | [Portfolio](#) | [GitHub/Abhishek1334](https://github.com/Abhishek1334) | [LinkedIn/AbhishekRajoria](https://www.linkedin.com/in/AbhishekRajoria)

SKILLS

Languages: TypeScript, JavaScript

Frontend: Next.js (App Router) 15/16, React 19, Vite, Tailwind CSS, shadcn/ui, Radix UI, Framer Motion, React Konva, Recharts

Mobile: React Native, Expo, Expo Router, NativeWind

State & Data: TanStack Query, Zustand, Redux Toolkit, Axios, React Hook Form

Backend & APIs: Node.js, Express.js, REST APIs, JWT, Session, OTP, API-Key auth, CSRF, Bcrypt.js

Databases: PostgreSQL, MongoDB, Mongoose, MySQL

Testing & QA: Vitest, Playwright, React Testing Library

Payments: Stripe, Razorpay | **DevOps:** Git, GitHub, Vercel, AWS Amplify, Docker, Railway | **Tools:** Postman, Cloudinary

EDUCATION

VIVEKANANDA INSTITUTE OF PROFESSIONAL STUDIES - BCA, CGPA: 8.0

New Delhi | 2025

D.A.V PUBLIC SCHOOL PUSHPANJALI ENCLAVE - 12th CBSE 84.6% | 10th CBSE 84.8%

New Delhi

EXPERIENCE

PRNK Infotech

Software Developer (promoted Feb 2026)

Aug 2025 - May 2026

Frontend Developer Intern

Feb 2026 - May 2026

Aug 2025 - Feb 2026

- Built a Google Ads SaaS analytics dashboard end-to-end for a client — owned UI design, API, and full stack delivery single-handedly; became the client's primary operational tool (per founder's LinkedIn recommendation).
- Led frontend of MinoriLabs: audited codebase, fixed broken filters/dashboards/API integrations, and ran a 10-day sprint coordinating frontend devs, backend engineers, and the client directly — delivered before deadline.
- Shipped production frontends across 5+ products in Next.js 15/16 (App Router) + React 19 + TypeScript: Freshbuyzar grocery (web + RN mobile app), QR Code Creator SaaS, Riders Choice e-commerce, MinoriLabs, Google Ads SaaS.
- Integrated Stripe + Razorpay end-to-end; improved Lighthouse 50 to 95 via Promise.all parallelization + server components; Vitest coverage 538/538 on qrcreator-fe; Playwright e2e before every push.

PROJECTS

FESTIFY - IoT-ENABLED EVENT TICKETING PLATFORM

[GitHub](#) | Feb 2025

- Dual-mode check-in - same /api/tickets/verify handles QR browser scans and ESP8266 RFID UID taps; binding established at ticket-issue time; solo build deployed end-to-end on Vercel.
- Migrated auth from localStorage JWT to httpOnly cookie + Bearer fallback; same-origin Vercel deploy eliminates CORS preflight; middleware reads cookie first then header for backwards compat.
- Vite SPA + Express as single Vercel project (api/index.js wraps Express); Mongoose connection cached on global._mongoose for serverless warm-reuse; standardized 11 pages on TanStack Query (~200 LOC removed).

Tech Stack: React 19, Vite, Tailwind CSS, Express, MongoDB, JWT (cookie+Bearer), Cloudinary, TanStack Query, ESP8266/RC522

MARKETPULSE - STOCK ANALYTICS SPA WITH AI ASSISTANT

[GitHub](#) | Mar 2025 - May 2026

- AI assistant on Vercel AI SDK + Gemini 2.5 Flash with 3 tools (getPortfolioSummary, getStockQuote, searchSymbol); streaming via streamText + pipeUIMessageStreamToResponse; tool-call chips surfaced inline.
- React 19 SPA + Express 5 as single Vercel Function via custom path rewrite; server-side LRU cache with namespace TTLs (60s quotes / 5min charts / 1h search) extended free Twelve Data quota ~10x.
- OKLCH-based amber accent unified across light/dark modes; cache hit-rate exposed at /api/stock/_cache-stats; sub-second cold start on Vercel Fluid Compute.

Tech Stack: React 19, Zustand, TanStack Query, Vite, Tailwind CSS, Express 5, MongoDB, Vercel AI SDK + Gemini 2.5 Flash, Chart.js, Twelve Data API

STAYFINDER - PROPERTY BOOKING MARKETPLACE WITH STRIPE

[GitHub](#) | Jun 2025 - May 2026

- End-to-end Stripe Checkout: webhook route registered with express.raw() before body parsers so signed payloads verify; idempotent on session.id to survive Stripe retries; race-safe booking via Mongoose transactions with date-overlap detection.
- Role-based dashboards (guest/host/admin); auto-promotes guest to host on first listing; API hardened with Helmet, compression, per-route rate limiting (auth 20/15min, api 300/15min), httpOnly cookie JWT, TypeScript throughout.
- 10-component editorial design system on shadcn/ui primitives - Fraunces serif headings, OKLCH color tokens, prefers-reduced-motion-aware animations; TypeScript across both frontend and backend.

Tech Stack: React 18 + TypeScript, Vite, Tailwind CSS, shadcn/ui, TanStack Query, Express + TypeScript, MongoDB, Stripe, Cloudinary, Framer Motion

CERTIFICATIONS

IBM Front End Web Development Internship Programme

Jun 2024 - Aug 2024

Newton School - SQL Fundamentals Certificate

Mar 2025
