SKILLS

Languages: TypeScript, JavaScript

Frontend: Next.js (App Router) 15/16, React 19, Vite, Tailwind CSS, shadcn/ui, Radix UI, Framer Motion, Recharts

Mobile: React Native, Expo, NativeWind

State & Data: TanStack Query, Zustand, Redux Toolkit, Axios, React Hook Form

Backend & APIs: Node.js, Express.js, REST APIs, JWT, Session, OTP, API-Key auth, CSRF, Bcrypt.js

Databases: PostgreSQL, MongoDB, Mongoose

Testing & QA: Vitest, React Testing Library

Payments: Stripe | **DevOps:** Git, GitHub, Vercel, Railway | **Tools:** Postman, Cloudinary

EXPERIENCE

Algobeat (formerly PRNK Infotech)

Frontend Developer Intern

Full-Stack Engineer (promoted Feb 2026)

Aug 2025 - May 2026

Aug 2025 - Feb 2026

Feb 2026 - May 2026

- Led end-to-end frontend architecture for a flagship B2B Google Ads SaaS platform, engineering campaign workflows and 11 client analytics dashboards using Next.js App Router and TanStack Query.
- Improved Lighthouse performance score from 50 to 95 across client platforms by refactoring state with Zustand, implementing parallel data fetching, and optimizing render cycles.
- Owined direct client engagement and product delivery, gathering requirements and shipping responsive UI/UX features using AI-assisted workflows (Cursor, Claude Code).
- Integrated secure multi-gateway checkout flows (Stripe & Razorpay) and maintained unit and component test coverage using Vitest and React Testing Library.
- Earned rapid promotion in 6 months by taking full ownership of frontend delivery across multiple web and mobile (React Native/Expo) products simultaneously.

PROJECTS

FESTIFY - IoT-ENABLED EVENT TICKETING PLATFORM

[GitHub](#)

- Built a full-stack event ticketing platform where attendees discover events, purchase tickets, and receive a unique QR code or RFID wristband for entry — organizers run a live check-in station via webcam scanner or RFID hardware, and admins manage all users and events.
- Engineered three distinct role-based experiences, real-time check-in with capacity enforcement and duplicate-booking prevention, secure cookie-based auth, and Cloudinary image uploads — deployed as a single full-stack application on Vercel.

Tech Stack: React 19, Vite, Tailwind CSS, Express, MongoDB, JWT (cookie+Bearer), Cloudinary, TanStack Query, ESP8266/RC522

MARKETPULSE - STOCK ANALYTICS SPA WITH AI ASSISTANT

[GitHub](#)

- Built a stock portfolio tracker and analytics app with watchlists, real holding tracking with cost basis and gain/loss calculations, and interactive charts featuring technical indicators (RSI, MACD, Bollinger Bands) across multiple timeframes.
- Integrated a conversational AI assistant that answers questions about the user's actual portfolio using live market data — built using Vercel AI SDK with tool-calling architecture and SSE streaming, surfacing which data lookups it performed in real time.

Tech Stack: React 19, Zustand, TanStack Query, Vite, Tailwind CSS, Express 5, MongoDB, Vercel AI SDK + Gemini 2.5 Flash, Chart.js, Twelve Data API

STAYFINDER - PROPERTY BOOKING MARKETPLACE WITH STRIPE

[GitHub](#)

- Built a full-stack property rental marketplace where guests search and book stays by location, price, amenities, and availability — hosts list and manage properties with multi-image uploads, and both sides get role-specific dashboards for bookings and reservations.
- Implemented Stripe-powered checkout with webhook-driven booking confirmation, calendar-aware availability with double-booking prevention, multi-parameter search with pagination, and a custom editorial design system built on accessible UI primitives.

Tech Stack: React 18, TypeScript, Vite, Tailwind CSS, shadcn/ui, TanStack Query, Express, MongoDB, Stripe, Cloudinary, Framer Motion

EDUCATION

VIVEKANANDA INSTITUTE OF PROFESSIONAL STUDIES - BCA, CGPA: 8.0

New Delhi | 2025

D.A.V PUBLIC SCHOOL PUSHPANJALI ENCLAVE - 12th CBSE 84.6% | 10th CBSE 84.8%
